

2026 PROSTATE BIOPSY CPT® CODE SUMMARY**TAKEN FROM AMA CPT® 2026 PROFESSIONAL EDITION**

Note: Many codes should not be reported with any other biopsy or ultrasound/imaging code including 76872 or 76942 unless indicated. See AMA CPT 2026 Professional Edition for full guidance and consult your billing specialist.

- 55700** Deleted
- 55705** Biopsy, prostate, any approach, nonimaging-guided
- 55706** Biopsy, prostate, transperineal stereotactic template-guided saturation prostate biopsies (No Change)

Ultrasound-Guided Codes

“Ultrasound-guided biopsies are typically performed in a systematic manner...[from sextants (6 areas)]...If discrete lesions are noted during the performance of a diagnostic ultrasound at the time of the biopsy procedure, additional targeted biopsies may be taken from each discrete lesion, but are not separately reported.”

- 55707** Biopsy, prostate, transrectal, ultrasound-guided (ie, sextant, ultrasound-localized discrete lesion[s])
- 55709** Biopsy, prostate, transperineal, ultrasound-guided (ie, sextant, ultrasound-localized discrete lesion[s])

MRI-Ultrasound-Fusion Guided Codes

“MRI-Ultrasound fusion is a guidance technique that utilizes an independent workstation to fuse a previously acquired (and previously reported) MRI dataset with real-time ultrasound imaging guidance to target lesion(s) previously identified by MRI.”

- 55708** Biopsy, prostate, transrectal, ultrasound-guided (ie, sextant) with MRI-fusion-guidance, first targeted lesion
- 55710** Biopsy, prostate, transperineal, ultrasound-guided (ie, sextant) with MRI-fusion-guidance, first targeted lesion
- 55711** Biopsy, prostate, transrectal, MRI-ultrasound-fusion-guided, targeted lesion(s) only, first targeted lesion
- 55712** Biopsy, prostate, transperineal, MRI-ultrasound-fusion-guided, targeted lesion(s) only, first targeted lesion
- 55715** Biopsy, prostate, each additional, MRI-ultrasound fusion or in-bore CT-MRI-guided targeted lesion (List separately in addition to code for primary procedure.)

Disclaimer: This is an educational summary only and not meant to replace complete review of the AMA printed guidance. Please see the **cpt 2026 Professional Edition** for additional direction on biopsy and imaging codes that may not be billed together and consult your billing specialist.

In-Bore CT-, MRI-Guided and Other Codes

| | |
|--------------|--|
| 55713 | Biopsy, prostate, in-bore CT- or MRI-guided (ie, sextant), with biopsy of additional targeted lesion(s), first targeted lesion |
| 55714 | Biopsy, prostate, in-bore CT- or MRI-guided targeted lesion(s) only, first targeted lesion |
| 55715 | Biopsy, prostate, each additional, MRI-ultrasound fusion or in-bore CT-MRI-guided targeted lesion (List separately in addition to code for primary procedure.) |
| 0443T | Real-time spectral analysis of prostate tissue by fluorescence spectroscopy |

Disclaimer: This is an educational summary only and not meant to replace complete review of the AMA printed guidance. Please see the **cpt 2026 Professional Edition** for additional direction on biopsy and imaging codes that may not be billed together and consult your billing specialist.
